KING LION
WHITEPAPER

ABSTRACT

King Lion is the newest coin in the crypto market that was created and backed by a full business software application.

King Lion is not just a meme coin, it comes with full business software that allows businesses to conduct research on Google®, Amazon®, YouTube®, Ebay® and Etsy®.

It is a BEP-20 token based on BSC.

INTRODUCTION

Decentralized finance is quickly rising as a more secure, more transparent, and more efficient alternative to traditional financial services. By eliminating the need for centralized financial institutions, we create a more open and trustworthy financial system, and one that's far more accessible.

Secured by blockchain technology, decentralized finance will reduce the risks of fraud, corruption and mismanagement of your assets. It will also make managing finance far more cost-effective and efficient, with no more overdraft fees, no costs for wire transfers, and no waiting on banking hours for a transaction to be verified.

The term decentralized finance, or DeFi for short, describes a financial system that operates without the need for traditional, centralized intermediaries. We're used to everything going through a bank and other financial institutions like a global exchange, but DeFi creates a system that can function on its own.

AUTOMATED LIQUIDITY

Liquidity is crucial for trading. The normal distribution of liquidity is simply the accessibility of tokens operated and controlled by a smart contract, facilitated by a decentralized trade.

To ensure the longevity of this project we are building liquidity into the smart contract. Liquidity can be taken as a component of the smart agreement utilizing market movement from all transactions. A part of these will be reserved by the smart contract. For this to occur, it can be kept in an independent pool inside the actual agreement and consequently transferred over to the liquidity pool.

Liquidity is then overseen by the agreement as it is sold and paired as needs be, in this manner it helps continue the growth and security of the project for all involved. As the token develops, the auto-liquidity will act as an ever-expanding market stability capable of absorbing large transactions.

TOKEN REFLECTION

Reflection rewards gather by essentially holding your tokens, and provisions an imaginative hold-cultivating reward structure that stands apart from customary pool-cultivating rewards.

The thought behind this capacity is to wipe out symbolic conditions that have made issues before, including, however not restricted to pooling assets in unconfirmed outsider smart contracts, external interfaces, transaction fees needed to claim rewards.

Prior models of decentralized tokens, for example, pool cultivating is exorbitant and depend on client activity to manually compound rewards. As an answer, we propose the usage of a compounding prize construction that requires no extra charges in a smart contract work, otherwise called token reflections. To accomplish this, reflection should occur without cost or effect on the client.

HOW THINGS WORK

2% of every transaction will be added to the liquidity so that our journey is the safest possible.

5% of every transaction will be used for redistribution to holders. The longer you hold, the more your wallet grows!

Keep holding, keep earning!

HOW THINGS WORK

2% of every transaction will be added to the marketing wallet. This will allo us to continue to promote and grow the project.

1% of every transaction will be autoburned. This means that we will decrease the amount of available tokens and make the project more valuable to all.

ABOUT THE SOFTWARE

With the King Lion Software Suite, you can research and deploy business assets and get traffic from Amazon®, Google®, YouTube®, eBay® and Etsy®. This makes it one of the most powerful research tools on the planet.

ABOUT THE SOFTWARE

GOOGLE®

Uncover what people are searching for on Google – 88 billion visitors a month use Google to search for everything – if you want to know what people want, just peak inside with the google tool with the click of a button.

AMAZON®

Tap into the biggest database of buyers in the world – people go to amazon to shop and spend money – if you want to find out what people buy simply enter your keyword and get hundreds if not thousands of buyer ideas in seconds.

YOUTUBE®

The biggest "how to" training ground online – people go to YouTube to learn how to do things – if you want to see what people want to learn, just use the YouTube tool and quickly find out.

ABOUT THE SOFTWARE

EBAY®

eBay is the biggest resale marketplace in the world. Imagine knowing exactly what people are looking to buy and then being able to give it to them. This allows you to conduct deep dive marketing research and find what people want.

ETSY®

Etsy has a huge platform of specialty items like no other marketplace online. Find out what people want and then be able to sell it to them quickly and easy with the click of a button.

THANK YOU

We appreciate your attention and look forward to you being part of the King Lion family.
